Xm is a service i am paying for if they wish to provide me with local or any other content it is there right they can send me any services they like i have xm cause i dont like the way that regular radio is being silenced. im an adult & i dont like my stations controlled like they are children. its my vote to let them provide whatever service or competition they like... as our free speech needs to be protected in these times... i chose to pay for an upgrade on a service i regularly get for free!
